ROOFING AND REMODELING LLC

DOOR • SIDING • WINDOWS

About Us

GreenLight Roofing and Remodeling all began with a simple dream to own a family operated business that would carry on to future generations. Matthew has been in the roofing and construction industry his entire adult life and grew up swinging a hammer and using every tool he could get his hands on. It is a labor of love that is being passed down to his kids. His wife, Rebekah, has been right next to him for the better part of 13 years now and is just as passionate as Matt when it comes to taking care of your biggest investment – your home.

Positive: Professionalism, Punctuality, Quality, Responsiveness, Value

Matt helped us with our old house, replacing the builder grade windows and adding much needed insulation. Even though we have a new house (built 2020), we are making plans to upgrade the windows here as well. Matt is always responsive and willing to help, even recently helping on some structural work for our shop. Highly recommend!!

Positive: Professionalism, Quality, Responsiveness

We had a really good experience working with GreenLight on our roof replacement. Matt is very professional, trustworthy, and reliable. His experience was very helpful with our insurance claim. The onsite work crew was efficient and easy to work with. I would gladly work with Matt again on any roofing needs. High quality work, start to finish!

Energy Efficiency - Upgrades that make CENTS!

Free Advanced Thermal Imaging Inspections! See What Your Home Needs Most. Have A Roof Leak You Can't Seem To Find? Air Leaking In The House? We Can Find And Fix Any Leak.

ATTIC INSULATION

The #1 Bang for Buck in increasing home efficiency and reducing heating/cooling bills.

NEW WINDOWS

Up to 40% of your heating/cooling costs are a result of lost energy through windows! This is a customer favorite because not only is your home more comfortable and more efficient, THEY LOOK ABSOLUTELY FANTASTIC! We carry over 10 lines of windows from basic to fully customized. Our professional installers make the process a breeze.

SPRAY FOAM

We can retrofit an older home or spray a new construction project. Ask us about the pros/cons of different types. On a new build, this can be the single best thing you ever spend money on.

SEALING DOORS AND WINDOWS

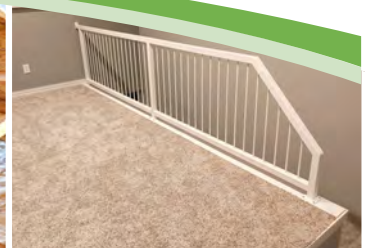

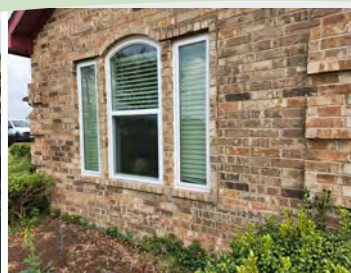

Not only is this super inexpensive, but it looks great and help get rid of pesky drafts. We adjust doors, replace weather stripping, and seal all openings.

RADIANT BARRIER ROOF DECKING

If we are installing a new roof on your home, ask us about radiant barrier decking. This isn't always the easiest to do, but when replacing a roof can be a great addition.

Beauty Forged with Performance

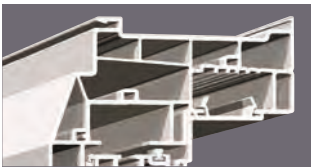

The closer you look, the more you'll see why Mezzo is a standout choice for your home.

FULLY FUSION-WELDED FRAME AND SASH CORNERS create superior strength and a clean, low-profile finished look.

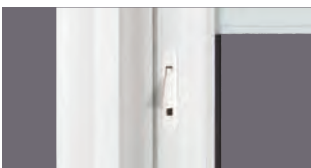

DUAL-PANE, DOUBLE-STRENGTH GLASS increases strength, durability and insulation.

AIRTIGHT INSULATING CHAMBERS enhance thermal performance and durability.

MULTI-LAYER WEATHERSTRIPPING helps block energy loss and protects against inclement weather.

DUAL VENT STOPS for limited and convenient opening of the window for ventilation. (Not available on single-hung or single-sliding windows.)

HIDDEN SCREEN TRACK creates a clean-line design for enhanced visual appeal; half screens are standard, optional full screens available.†

High-Performance + Glass Packages –

Maximize Your Energy Savings Year-Round.

Reducing energy loss is often the number one reason for purchasing replacement windows. Windows are roughly 80% glass, so it's important to choose the ideal glass system for your home and climate. Upgrading to a high-performance Low-E (low-emissivity) insulated glass package will help further increase year-round energy savings.

Winter Energy Savings: Low-E insulating glass reduces heat loss by reflecting warm air back into your home.

Summer Energy Savings: Low-E helps block unwanted solar heat penetration to help reduce air-conditioning usage.
